

QSense QSX 343 Mixed Starch, coloured

This standardized soil of coloured mixed corn rice starch is suitable for measuring the performance of amylase enzymes in dishwasher detergents.

Sensor specifications

Description	Mixed starch sensor (CFT DM77)
Sensor surface	SiO ₂ (glass)
Stability	Moderately stable in MilliQ water and aqueous buffers at room temperature for one hour
Storage	Room temperature in nitrogen atmosphere packaging.
Shelf Life	Stable at least 12 weeks from package date in unopened package, see expiry date on package.
Usage	Evaluate enzyme activity and soil removal process by cleaning profile analysis. Please note that the highest harmonics may not be detected due to the thickness of the soil layer. QSensors are intended for one-time use only.

Specifications may be subject to change without notice.

Note:

QSensors are developed and produced to provide you with stable, reliable and reproducible data. Full performance is ensured through extensive quality controls, and guaranteed for one-time use according to the recommendations.
