# Beginning-to-end Solutions for Microbiology

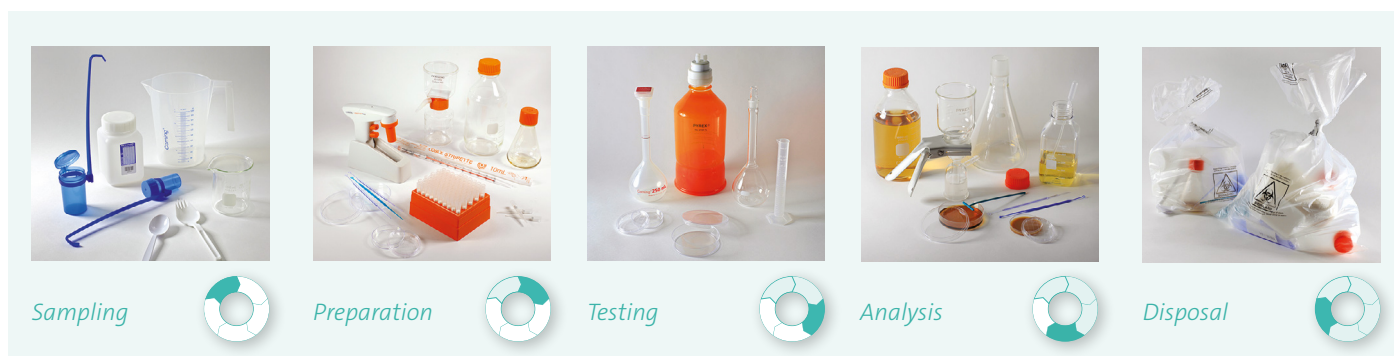

For premium quality and performance in quality testing labs, you can count on Corning. In our continuous efforts to improve efficiencies and develop new tools for microbiology applications, we have scientists working in Corning labs doing what you do every day, across the globe. From sampling and preparation to bacteria growth and analysis, our technical experts understand your challenges and the changing regulatory requirements that shape your day-to-day processes.

It is this expertise, plus a 160-year legacy of Corning innovation and manufacturing excellence, that puts us in a unique position to be able to offer high quality, reliable microbiology consumables for quality testing labs. Our Corning® Gosselin™ line of consumables including Petri dishes, dippers and inoculating loops completes our portfolio, creating a beginning-to-end solution for quality testing labs across industry segments.

Corning Gosselin brand products are optimized for both food and beverage and environmental testing laboratories. The line of quality testing consumables complies with International Environmental standards, and includes a range of features to ensure traceability.

This product selection guide highlights the Corning products and brands which support the quality testing process at each stage.

## Corning Gosselin Brand Products

Corning has been a pioneering brand of disposable labware for microbiology in Europe since 1965. Corning Gosselin products offer:

- ▶ A complete range of products to meet your testing needs
- ▶ Manufacturing facility is:
  - Raw materials/resins, compliancy with 94/62/EC and Registration, evaluation, authorization and restriction of chemicals (REACH) compliant
  - ISO 9001 certified
  - ISO 14001 certified
- ▶ Easily accessible traceability features such as:
  - Peelable labels with lot numbers, expiration date, and sterilization information to insert in your laboratory notebook
  - Sterilization treatment visual indicator on each case
  - Certificates of Compliance can be downloaded at [www.corning.com/resources](http://www.corning.com/resources).

## Ask the Scientist

Corning Scientific Support can help you succeed in any stage of your experiment. With a broad background in different life science disciplines, our support scientists offer valuable help for basic and advanced product support, designing new experiments, using the right product, and delivering the necessary product documentation.

### Scientific support at a glance

- ▶ Pre- and post-sales application support
- ▶ Protocol set up and optimization
- ▶ Help choosing the right product
- ▶ Product documentation and information
- ▶ Product certificates
- ▶ Lot-specific information and reservation
- ▶ Troubleshooting experiments and data

### We understand you

- ▶ We are scientists
- ▶ We offer extensive product experience
- ▶ We think out-of-the-box and try to find the best solution for you and your experiment

## Quality Commitment

### Corning® Gosselin™ SAS Facility Quality Commitment

Corning Gosselin SAS facility is ISO 9001 and ISO 14001 certified. The ISO certifications verify our facilities meet international quality system standards. ISO compliance gives our customers an added level of assurance that Corning is committed to continuous improvement. For more information visit [www.corning.com/resources](http://www.corning.com/resources).

## Glossary

### Sterility Assurance Level (SAL)

Sterile SAL of  $10^{-6}$

- ▶ Sterility obtained through use of ionizing radiation
- ▶ Sterilized to achieve a Sterility Assurance Level (SAL) of  $10^{-6}$
- ▶ Sterilization process is validated per standard AAMI/ANSI/ISO 11137

Sterile SAL of  $10^{-3}$

- ▶ Sterility obtained through use of ionizing radiation
- ▶ Sterilized to achieve a Sterility Assurance Level (SAL) of  $10^{-3}$
- ▶ Sterilization performed at a lower dose than product with SAL  $10^{-6}$
- ▶ Sterilization process is validated per standard AAMI/ANSI/ISO 11137

Aseptic

- ▶ Products are manufactured in a controlled environment, without human intervention during the manufacturing process.
- ▶ Finished products with an Aseptic claim are not subjected to sterilization and do not make a claim to have a Sterility Assurance Level.

### Standards

- ▶ ISO 11137: Sterilization of health care products – Radiation.
- ▶ Regulation REACH, no. 1907/2006/CE: Registration, Evaluation, Authorization and Restriction of Chemicals (REACH).
- ▶ Regulation (EC) no 1935/2004: on materials and articles intended to come into contact with food and repealing Directives 80/590/EEC and 89/109/EEC.
- ▶ 94/62/EC: The Directive aims to prevent or minimize the impact of packaging and packaging waste on the environment through recovery and recycling targets (absence of heavy metal).

## Overview

### Advantages of Corning® Gosselin™ Petri Dishes

- ▶ **Optimal flatness:** To ensure the agar's constant depth.
- ▶ **Adequate clarity:** The injection point situated on the side of the dish bottom optimizes reading even by image analyzing systems.
- ▶ **Lightness:** Thanks to research, we have been able to determine the ideal weight of our dishes in order to reduce our customers waste disposal costs while still pursuing our objective: to provide high quality dishes.
- ▶ **Stable stacking:** The stacking ring is specially designed to improve the stacking of dishes and making them more practical to use.
- ▶ **Class 100 manufacturing environment**
- ▶ **Product traceability:** Thanks to the product label on each box, we can trace each production cycle. This label includes the date and time of manufacturing, lot number, the Sterilization Assurance Level (SAL), and the expiration date.
- ▶ **Raw materials:** Compliant with the European directives (94/62/EC), food compatibility (1935/2004/CE and 10/2011/CE).

### Two Types of Packaging

#### One outer bag

Packaging type: Standard

Outer bag: 1

Packaging:

- ▶ Sleeves are placed directly in the case

#### Zero or double outer bags

Packaging type: Suitable for clean room use

Outer bag: 0 or 2

Packaging:

- ▶ Sleeves are placed in a sealed bag with bar code
- ▶ Bags are placed in a second folded bag
- ▶ Final packaging in a case

### Contact Dishes

- ▶ 3 or 4 vents
- ▶ Crystal Polystyrene
- ▶ Molded grid 10 x 10 mm
- ▶ Easy opening
- ▶ Manufactured in class 100 environment

## Overview

### Advantages of Corning® Gosselin™ Bottles

- Manufacturing process:** All bottles are produced with advanced equipment using extrusion blow molding or injection blow molding technology. Each production lot is subject to inspection throughout the entire production process according to the normative references, which are reinforced by Corning's own specifications.
- Bottle shapes:** Corning offers a wide range of bottles: octagonal, round, square, and rectangular. Bottles are available from 30 to 2700 mL, with narrow or wide necks, and many have molded graduations.
- Closure systems:** Various closure systems are available, from simple screw caps to tamper-evident hinged caps. All closures are designed with vertical ribs to improve handling.
- Packaging:** Our packaging is designed to suit your needs, with individually bagged or pre-assembled bottles wrapped in packs or trays. All bottles are protected by a Polyethylene outer bag within the box to reduce the risk of particle contamination.
- Product traceability:** Product labels on each box allow us to trace each production cycle. This label includes the date and time of manufacturing, lot number, and the expiration date for sterilized products.
- Raw materials:** Compliant with the European directives (94/62/EC) and food compatibility (1935/2004/EC and 10/2011/EC).

## Features

### PET Bottles, Filmed Packaging

### Bottles, Octagonal

Example of use: microbiological media packaging.

- ▶ Polyethylene terephthalate (PET) bottles
- ▶ Break-resistant
- ▶ Molded graduations
- ▶ Ergonomic shape for easy handling
- ▶ Leak-proof, tamper-evident HDPE screw cap
- ▶ Transparent as glass
- ▶ Sterility Assurance Level (SAL) of 10<sup>-3</sup>

All packs have traceability label.

Molded graduations.

## Water Sampling

- ▶ Polyethylene terephthalate (PET) is transparent and break-resistant
- ▶ Molded graduations for accurate volume sample collection
- ▶ Powdered sodium thiosulfate is easier to dissolve than tablets
- ▶ Labeled with lot number, expiration date, and sodium thiosulfate dosage information
- ▶ Wide neck for easier sample collection
- ▶ Easy-grip cap
- ▶ Tamper-evident screw cap to ensure integrity until collection
- ▶ Sterile

### Labels

- ▶ Traceable
- ▶ Clearly visible sterility level
- ▶ Clear label distinction
  - Blue labels for natural non-chlorinated water
  - Red and green labels for chlorinated water
- ▶ Designated area for essential information
- ▶ 128 EAN bar code for product traceability

### Standards

Certified with the following standards:

	<b>ISO 5667-3</b>	Quality of water for water sampling Part 3: Guidelines for preservation and handling for water sampling
	<b>ISO 19458</b>	Quality of water for water sampling for microbiology analysis

### Bottles, Octagonal

- ▶ Polyethylene terephthalate (PET) bottles
- ▶ Break-resistant
- ▶ Transparent as glass
- ▶ Molded graduations
- ▶ Label for traceability
- ▶ Tamper-evident screw cap
- ▶ Sterility Assurance Level (SAL) of 10<sup>-3</sup>

## Overview

### Advantages of Corning® Gosselin™ Containers

- ▶ **Manufacturing process:** All containers are produced with high-tech equipment using molding technology. Most of our products are assembled in line to avoid any external contaminations. The raw plastics used are virgin and comply with the environmental standards in force. Each production lot is subject to inspection throughout the entire production process according to the standard referenced, which are reinforced by Corning's own specifications.
- ▶ **Container shape:** A wide range of straight containers, conical containers, and pots to meet customers' requirements. Containers are available from 25 mL to 1000 mL.
- ▶ **Closure systems:** Closure systems for our containers are suitable for normal use. Closure systems are available with hinged caps, screw caps, or snap caps.
- ▶ **Packaging:** Perfectly adapted to the user's needs: single bag, packing of containers into boxes, screw-capped containers wrapped on trays. All containers are protected by a Polyethylene outer bag placed inside the boxes beforehand to avoid particle contamination.
- ▶ **Product traceability:** Thanks to the product label on each box, we can retrace each production cycle. This label includes date and time of manufacturing, lot number, and expiry date if the product has been sterilized.
- ▶ **Raw materials:** Compliant with European directives, including the absence of heavy metals (94/62/EC). Raw materials of containers are food contact grade (comply with 1935/2004/EC and 10/2011/EC)\*

\*Corning suppliers guarantee the quality of their raw materials through a certificate of compliance. However, the finished products have not been validated for food contact applications. They are designed for laboratory applications only.

**Products compliant with international standards**

**Wide scope of applications**

**Range of products suitable worldwide**

**Packaging suitable for users' needs**

## Overview

### Advantages of Corning® Gosselin™ Tubes and Closures

- ▶ **Manufacturing process:** All closures and tubes are produced with high-tech equipment using injection molding technology. The raw plastics used are virgin and comply with the current environmental standards. Each production lot is subject to inspection throughout the entire production process according to the standard references, which are reinforced by Corning's own specifications.
- ▶ **Tubes shapes:** Wide range of tubes: round bottom, conical bottom, flat bottom, winged bottom, can be used with the different analyzers is on the market.
- ▶ **Resistance:** Most of our tubes are designed to withstand centrifugation up to a maximum at 3000 g with a suitable adaptor in a balanced rotor.
- ▶ **Closures:** Our closures are suitable for different usage of tubes and applications. That's why we offer screw, straight, or winged caps. All closures are vertically ribbed for easier grip.
- ▶ **Packaging:** All tubes are protected with a Polyethylene outer bag placed inside the boxes beforehand to prevent any risk of particle contamination.
- ▶ **Product traceability:** Thanks to the product label on each box, we can trace each production cycle. This label includes date, time of manufacturing, and lot number.
- ▶ **Raw materials:** Compliant with the European directives in force (CE N°1935/2004). Food compatibility (94/62/EC).

## Overview

### Advantages of Sampling and Inoculation Products

- Use:** A full range of disposable products from sampling to inoculation. Packaging has been designed to meet the user's expectations (individual wrapping, multiple packs). Our products are adapted in terms of packaging and product specification.
- Packaging:** All Corning® Gosselin™ products are protected by a Polyethylene outer bag placed inside the boxes beforehand to prevent any risk of particle contamination.
- Product traceability:** Thanks to the product label on each box, we can retrace each production cycle. This label includes date and time of manufacturing, lot number, and expiry date if the product has been sterilized.
- Raw materials:** Compliant with the European directives in force (CE N°1935/2004) and food compatibility (94/62/EC).

## Overview

### Advantages of Transportation and Disposal Range of Products

- ▶ **Use:** These products meet the usual requirements for the different applications (clinical, microbiology, industrial). Our transportation products comply with industry standards where applicable.
- ▶ **Packaging:** All products are protected by a Polyethylene outer bag placed inside the box beforehand to avoid any risk of particle contamination.
- ▶ **Product traceability:** Thanks to the product label on each box, we can trace each production cycle. This label includes date, time of manufacturing, and lot number.
- ▶ **Raw materials:** Compliant with the European directives in force (CE N°1935/2004) and food compatibility (94/62/EC).

### Waste and Sharp Containers

- ▶ Medical and portable use
- ▶ Polypropylene body
- ▶ Autoclavable
- ▶ Definitive tamper-resistant closure

PS = Polystyrene

The data in this product selection guide are based on information and documentation provided by our raw material suppliers and on our own many years of technical experience. Customers should test our products to ensure that they are suitable for their own specific requirements. The information provided is for guidance only and we cannot accept further responsibility.

## Traceability

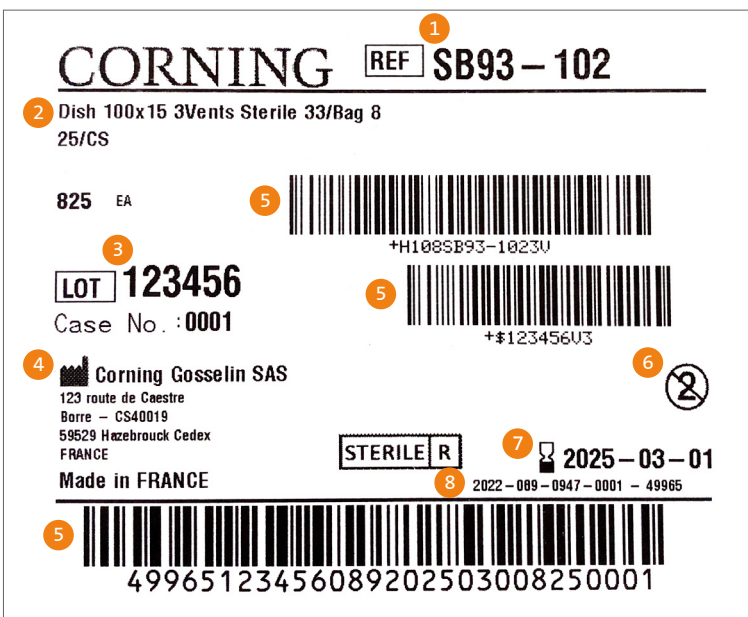

All Corning® Gosselin™ products come with convenient traceability features such as labels with lot number and expiration date. These labels easily peel-off and can be placed in your laboratory notebook.

## Ionization Certificate

- 1 Sterilization indicator: becomes red after sterilization
- 2 Product information: reference, lot number
- 3 Sterilization information: date, carton number
- 4 Detachable certificate (for your records)
- 5 Details and information remain on the outer carton

## Product Label

- 1 Catalog number
- 2 Product description, quantity per case
- 3 Lot number
- 4 Manufacturing plant
- 5 Bar codes
- 6 Single use symbol
- 7 Expiration date
- 8 Year, day, time of production, and case number
