# Beginning-to-end Solutions for Microbiology

[www.corning.com/lifesciences/solutions](http://www.corning.com/lifesciences/solutions)

For premium quality and performance in quality testing labs, you can count on Corning. In our continuous efforts to improve efficiencies and develop new tools for microbiology applications, we have scientists working in Corning labs doing what you do every day, across the globe. From sampling and preparation to bacteria growth and analysis, our technical experts understand your challenges and the changing regulatory requirements that shape your day-to-day processes.

It is this expertise, plus a 160-year legacy of Corning innovation and manufacturing excellence, that puts us in a unique position to be able to offer high quality, reliable microbiology consumables for quality testing labs. The recent introduction of our Corning® Gosselin™ line of consumables including Petri dishes, dippers and inoculating loops, has completed our portfolio, creating a beginning-to-end solution for quality testing labs across industry segments.

This product selection guide provides a step-by-step guide highlighting the Corning products and brands which support the quality testing process at each stage.

## Corning Brands for Microbiology

**Corning Gosselin** brand products are optimized for both food and beverage and environmental testing laboratories. The line of quality testing consumables complies with International Environmental standards, and includes a range of features to ensure traceability.

For 100 years, Corning has developed special glass for use in both chemical and life science laboratories. **PYREX® glassware** is made from Type 1, Class A low expansion borosilicate glass that has become the accepted standard in chemistry labs across the globe.

For more information on PYREX glassware, visit [www.corning.com/pyrex](http://www.corning.com/pyrex).

# Corning® Gosselin™ Brand Products

Corning has been a pioneering brand of disposable labware for microbiology in Europe since 1965.

Corning Gosselin products offer:

- ▶ A complete range of products to meet your testing needs
- ▶ Manufacturing facility that is:
  - CE compliant and US FDA registered for some products
  - Raw materials/resins, compliancy with 94/62/EC and REACH
  - ISO 9001 certified
  - ISO 14001 certified
- ▶ Easily accessible traceability features such as:
  - Peelable labels with lot numbers, expiration date, and sterilization information to insert in your laboratory notebook
  - Sterilization treatment visual indicator on each case
  - Certificates of Compliance can be downloaded on our website

# Scientific Support

## Ask the Scientist

Corning Scientific Support can help you succeed in any stage of your experiment. With a broad background in different life science disciplines, our support scientists offer valuable help for basic and advanced product support, designing new experiments, using the right product, and delivering the necessary product documentation.

### Scientific support at a glance:

- ▶ Pre- and post-sales application support
- ▶ Protocol setup and optimization
- ▶ Help choosing the right product
- ▶ Product documentation and information
- ▶ Product certificates
- ▶ Lot-specific information and reservation
- ▶ Troubleshooting experiments and data
- ▶ Need more? Tell us.

### We understand you

- ▶ We are scientists
- ▶ We offer extensive product experience
- ▶ We think out-of-the-box and try to find the best solution for you and your experiment

## Quality Commitment

### Corning® Gosselin™ SAS Quality Commitment

Corning Gosselin SAS is ISO 9001 and ISO 14001 certified. The ISO certifications verify our facilities meet international quality system standards. ISO compliance gives our customers an added level of assurance that Corning is committed to continuous improvement. To obtain copies of our ISO certificates, contact our Scientific Support Team at [ScientificSupport@corning.com](mailto:ScientificSupport@corning.com).

[www.corning.com/lifesciences](http://www.corning.com/lifesciences)

Hours of Operation: Monday to Friday, 8:00 a.m. to 6:00 p.m. (Eastern Standard Time)

Customers outside of the U.S., please contact your local Corning distributor, [www.corning.com/lifesciences](http://www.corning.com/lifesciences).

## Phone/Fax Orders

For each order, customers should provide the Corning product number, product description, and desired quantity. You should also include your billing and shipping address and your Corning account number.

## Online Orders

In order to purchase Corning products online, please visit the Corning Life Sciences website at [www.corning.com/lifesciences](http://www.corning.com/lifesciences). Click on “Order Now, Login” and complete the online registration form. Customers using credit cards may immediately place orders. Full Service Direct accounts with account specific contract pricing will need to establish a direct account with Corning Customer Service before online transactions can be made. You can complete the online registration form or contact Corning Customer Service directly at 1.800.492.1110 in order to establish a direct account with Corning.

## Ordering Products Through our Distribution Partners

Customers can purchase Corning products from any one of our more than 50 authorized distributors. See our complete listing of Corning distributors online at [www.corning.com/lifesciences](http://www.corning.com/lifesciences). Our distribution partners can offer our customers a variety of value added services from local inventory and service, to managed services, and preferred programs. Please contact your distributor of choice for more details.

## Pricing

Prices shown on the Corning Life Sciences website (in our online [www.corning.com/lifesciences](http://www.corning.com/lifesciences) catalog) reflect our current suggested U.S. list price. For customer specific pricing information, please contact Corning Customer Service or your authorized Corning Distributor.

## Product Return Policy

To return product, contact your local Customer Service Representative. The order and lot number details are required. Please have this information available to obtain a Return Authorization Number. This Return Authorization Number must be referenced on the outside of the shipping carton. Returns without an approved Return Authorization Number will be refused and returned at the customer's expense.

## Overview

### Advantages of Corning® Gosselin™ Petri Dishes

- ▶ **Optimal flatness:** To ensure the agar's constant depth.
- ▶ **Adequate clarity:** The injection point situated on the side of the dish bottom optimizes reading even by image analyzing systems.
- ▶ **Lightness:** Thanks to research, we have been able to determine the ideal weight of our dishes in order to reduce our customers waste disposal costs while still pursuing our objective: to provide high quality dishes.
- ▶ **Stable stacking:** The stacking ring is specially designed to improve the stacking of dishes and making them more practical to use.
- ▶ **Class 100 manufacturing environment**
- ▶ **Product traceability:** Thanks to the product label on each box, we can trace each production cycle. This label includes the lot number, the Sterilization Assurance Level (SAL), and the expiration date.
- ▶ **Raw materials:** Compliant with the European directives, especially the absence of heavy metals (94/62/EC), food compatibility (1935/2004/CE and 10/2011/CE).

## Overview

### Advantages of Corning® Gosselin™ Bottles

- ▶ **Manufacturing process** – All bottles are produced with advanced equipment using extrusion blow molding or injection blow molding technology. Each production lot is subject to inspection throughout the entire production process according to the normative references, which are reinforced by Corning's own specifications.
- ▶ **Bottle shapes** – Corning offers a wide range of bottles: octagonal, round, square, and rectangular. Bottles are available from 30 to 2700 mL, with narrow or wide necks, and may have molded graduations.
- ▶ **Closure systems** – Various closure systems are available, from simple screw caps to tamper-evident hinged caps. All closures are designed with vertical ribs to improve handling.
- ▶ **Packaging** – Our packaging is designed to suit your needs, with individually bagged or pre-assembled bottles wrapped in packs or trays. All bottles are protected by a Polyethylene outer bag within the box to reduce the risk of particle contamination.
- ▶ **Product traceability** – Product labels on each box allow us to trace each production cycle. This label includes lot number and expiry date for sterilized products.
- ▶ **Raw materials** – Compliant with the European directives, including the absence of heavy metals (94/62/EC) and food compatibility (1935/2004/EC and 10/2011/EC).

## Overview

### Advantages of Corning® Gosselin™ Containers

- ▶ **Manufacturing process:** All containers are produced with high-tech equipments using molding technology. Most of our products are assembled in line to avoid any external contaminations. The raw plastics used are virgin and comply with the environmental standards in force. Each production lot is subject to inspection throughout the entire production process according to the standard referenced, which are reinforced by Gosselin's own specifications.
- ▶ **Container shape:** A wide range of straight containers, conical containers, and pots to meet customers' requirements. Containers are available from 25 mL to 1000 mL.
- ▶ **Closure systems:** Closure systems for our containers are suitable for normal use. Closure systems are available with hinged caps, screw caps, or snap caps.
- ▶ **Packaging:** Perfectly adapted to the user's needs: single bag, packing of containers into boxes, screw-capped containers wrapped on trays. All containers are protected by a polyethylene outer bag placed inside the boxes beforehand to avoid particle contamination.
- ▶ **Product traceability:** Thanks to the product label on each box, we can retrace each production cycle. This label includes lot number and expiry date if the product has been sterilized.
- ▶ **Raw materials:** Compliant with European directives, including the absence of heavy metals (94/62/EC) and food compatibility (1935/2004/EC and 10/2011/EC), and CE marking relating to medical devices for *in vitro* diagnostics (98/79/EC).

**Products compliant with international standards**

**Wide scope of applications**

**Range of products suitable worldwide**

**Packaging suitable for users' needs**

## Overview

### Advantages of Transportation and Disposal Range of Products

- ▶ **Use:** These products meet the usual requirements for the different applications (clinical, microbiology, industrial). Our transportation products comply with industry standards where applicable.
- ▶ **Packaging:** All products are protected by a polyethylene outer bag placed inside the box beforehand to avoid any risk of particle contamination.
- ▶ **Product traceability:** Thanks to the product label on each box, we can trace each production cycle. This label includes lot number and expiry date if the product has been sterilized.
- ▶ **Raw materials:** Compliant with the European directives in force, especially the absence of heavy metals (CE N°1935/2004) and food compatibility (94/62/EC).

### Transportation and Disposal

### Autoclave Bags

- ▶ Polypropylene resistant bags
- ▶ Every bag is 40 µm thick
- ▶ Wide range of volumes (3000 mL to 33000 mL)
- ▶ Nonsterile

## Corning® Gosselin™ Blender

### Easy to Clean

- ▶ Removable stainless steel paddles
- ▶ Autoclavable paddles and door
- ▶ Removable blending chamber
- ▶ Built-in waste drawer

### Adjustable Speed, Time, and Blending Strength

- ▶ Blending capacity: 80 to 400 mL bags
- ▶ Program setting mode (9 programs)
- ▶ Adjustable timer: 10 seconds to 210 seconds, or continuous
- ▶ Adjustable speed (strokes/min.): slow (450), normal (550), and fast (650)

### Other Features

- ▶ Low noise level (51 dBA)

### Corning Gosselin Blender

## Corning Gosselin Diluter

### Easy to Use

- ▶ Includes a removable bag holder
- ▶ Intuitive software with pictograms
- ▶ Dual pump mode to reduce dilution time
- ▶ Recordable dilution parameters

### Accurate

- ▶ Weighing accuracy  $\leq 1\%$  for weights greater than 5 g
- ▶ Dilution accuracy  $< 1\%$

The data in this catalog are based on information and documentation provided by our raw material suppliers and on our own many years of technical experience. Customers should test our products to ensure that they are suitable for their own specific requirements. The information provided is for guidance only and we cannot accept further responsibility.

## Traceability

All Corning® Gosselin™ products come with convenient traceability features such as labels with lot number and expiration date. These labels easily peel-off and can be placed in your laboratory notebook.

### Ionization Certificate

- 1 Sterilization indicator: becomes red after sterilization
- 2 Product information: reference, lot number
- 3 Sterilization information: date, carton number
- 4 Detachable certificate (for your records)
- 5 Details and information remain on the outer carton

### Product Label

The product label on the outside of each case clearly displays traceability information.

- 1 Product description in multiple languages
- 2 Product code
- 3 Quantity per case and per inner pack
- 4 Lot number
- 5 Single use symbol
- 6 Year, day, time of production, and case number
- 7 Expiration date
- 8 Bar codes
- 9 Manufacturing plant
- 10 IVD/CE - CE Mark if applicable
- 11 Sterility Assurance Level (SAL)

# Glossary

## Sterility Assurance Level (SAL)

### Sterile SAL $10^{-6}$

- ▶ Sterility obtained through use of ionizing radiation
- ▶ Sterilized to achieve a Sterility Assurance Level (SAL) of  $10^{-6}$
- ▶ Sterilization process is validated per standard AAMI/ANSI/ISO 11137

### Sterile SAL $10^{-3}$

- ▶ Sterility obtained through use of ionizing radiation
- ▶ Sterilized to achieve a Sterility Assurance Level (SAL) of  $10^{-3}$
- ▶ Sterilization performed at a lower dose than product with SAL  $10^{-6}$
- ▶ Sterilization process is validated per standard AAMI/ANSI/ISO 11137

### Aseptic

- ▶ Products are produced in a tightly controlled environment
- ▶ Fully automated manufacturing process from product molding to packaging
- ▶ Products that are aseptic do not have a Sterility Assurance Level (SAL).

### Standards

- ▶ ISO 11137: Sterilization of health care products – Radiation.
- ▶ Regulation REACH, no. 1907/2006/CE: Registration, Evaluation, Authorization and Restriction of Chemicals (REACH).
- ▶ Regulation (EC) no 1935/2004: on materials and articles intended to come into contact with food and repealing Directives 80/590/EEC and 89/109/EEC.
- ▶ 94/62/EC: The Directive aims to prevent or minimize the impact of packaging and packaging waste on the environment through recovery and recycling targets (absence of heavy metal).

Corning® Gosselin™ has been a pioneering brand of disposable labware for microbiology since 1965.

[www.corning.com/lifesciences/solutions](http://www.corning.com/lifesciences/solutions)

For premium quality and performance in quality testing labs, you can count on Corning. In our continuous efforts to improve efficiencies and develop new tools for microbiology applications, we have scientists working in Corning labs doing what you do every day, across the globe. From sampling and preparation to bacteria growth and analysis, our technical experts understand your challenges and the changing regulatory requirements that shape your day-to-day processes.

It is this expertise, plus a 160-year legacy of Corning innovation and manufacturing excellence, that puts us in a unique position to be able to offer high quality, reliable microbiology consumables for quality testing labs. The introduction of our Corning Gosselin Microbiology product line has completed our portfolio, creating a beginning-to-end solutions for quality testing labs across industry segments.
